Business Duplication Services

**Printing at the Speed
of Business**

Print Matters

It has been said that with the coming of the “digital age”, conventional printing would give way to electronic screens...

I am so glad they were wrong, Print Media is as strong as ever, more so now with the advancement of print technologies.

E-mails are often deleted by potential clients if they don't have prior knowledge that you are sending them an email, tweets and texts wind up unread or considered spam.

Businesses spend large portions of their budgets on printing, business cards, flyers, brochures, packaging, promotional items and more...

Many printing businesses invest in the latest printing technologies, and raise prices on their clients, affecting the clients budgets , this is where JET Art & Graphics can help.

We offer design and print services at a lower cost per page or item and work with our client's budgets.

We have NO MINIMUMS, so if you need 100 pages, no problem! You need 1000 pages, no problem! You need 10 T-Shirts, 2 coffee mugs, 5 posters...again, no worries.

In addition if you are local...WE DELIVER FOR FREE!

Keep Reading, it gets better!

EVERYONE LOVES BEING HEARD

Taking your urgent project to a printer should not end in frustration. If you have experienced printers and designers that do not take the time to consider your needs, do not value your time, or do not value your work; you have probably experienced delays or costly reprint orders.

JET Art & Graphics values your time and needs, we take the time to listen to you, documenting all your details, leading to meeting your deadlines while providing realistic feedback about your creative assets and print production.

PRODUCTION PLANNING

Have a large project with multiple end points? Need your finished products shipped to different locations or offices?

JET Art & Graphics can help!

Getting your finished jobs out to you, or to your office destinations is a breeze, with local delivery as well as traditional shipping services. You will receive your orders ON TIME! We know receiving your orders when you need them is important.

PAPER, PAPER, PAPER

Why is the paper important?

The color of the paper, the weight, the texture and size will all determine the response of your target audience. You can have the best fonts, the best pictures, the best design... but if you don't use the right paper, you have just wasted money. Many modern print shops will not help you select the right paper for the job, and are staffed by employees that only know how to push buttons. This is unfortunate, but true.

JET Art & Graphics has the knowledge of paper stock to get your valuable message to your clients.

CLEAR & VIVID COLOR IMAGES

Experienced print services should know color processes, whether created by ink or laser toner, printing machines should be maintained to provide the best print quality.

JET Art & Graphics uses machines that are quality checked and calibrated to provide the best print quality that will show your target audience with an accurate and stunning insight of what you offer.

With over 40 years in design and printing, JET Art & Graphics can work with you to make sure your printing project truly reflects you, your company and your mission, all while keeping you on track and on budget,.

Our goal is your success.
